

Mrs. Atkins' Space Log

OCTOBER

Bible Verses: You will find a list of October's Bible verses on the back of the newsletter.

Classroom Snapshot

Math: This month, we will review long division and begin working with two-digit divisors. In my class, I use the acronym D.M.S.C.B (Does McDonald's Sell Cheese Burgers) to help students remember the steps: Divide, Multiply, Subtract, Check, Bring down.

Social Studies: We will be wrapping up our unit on states and capitals in class. However, students should continue studying their states and capitals on satellite days to prepare for upcoming assessments. Memorizing all of the states and their capitals takes time, so I want to give students plenty of opportunities to practice. That said, it's important that they are studying diligently each satellite day. Some great study tools you can use at home include flash cards, Seesaw journal assignments, ORBIT binder resources, and online quizzes such as <https://www.geoguessr.com/vgp/3063>.

Science: This month, students will be learning about how energy transfers within ecosystems. They will learn about interdependent relationships between organisms and explore how small changes to an ecosystem can have a great impact.

Fall Break: There is no school or satellite work October 5th - 12th. Students will have an optional Fall Break Bingo sheet in their ORBIT binders that they can complete over the break. These activities include math fact practice and a few other fun activity suggestions. Students who complete a row on their bingo sheet can turn it in for a small prize.
